

DevOps Portfolio

CARI.net your path to the cloud

We make your project successful

Software Development projects require a team that can implement **projects with high quality and safety standards.**

At **CARI.net**, what matters the most to us is the success of our clients, that is why we constantly train our **project managers and developers**, so that they can implement an **agile software development methodology** in all of our current projects.

We have many years of experience in the development and implementation of web, desktop and mobile applications. This expertise allows us to control the entire development process, from planning and development, to quality control and deployment.

Azure DevOps Gold Partners

DevOps is a combination of software development and operations. DevOps helps organizations deploy software more frequently. In the modern world of software delivery, developers are focused on shipping code often.

We are a **Microsoft Gold DevOps Partner** and can help you achieve your goals. From source code control, package management, build definitions as code, quality assurance and release automation to continuously integrate your software. Our DevOps team can help you deploy your application faster and with confidence.

The **iBizPanel** Project

The **iBizPanel** is a software suite that automates your entire web hosting business. It was created specifically to offer web hosting companies, web developers, and system integrators the tools to easily launch and manage their business.

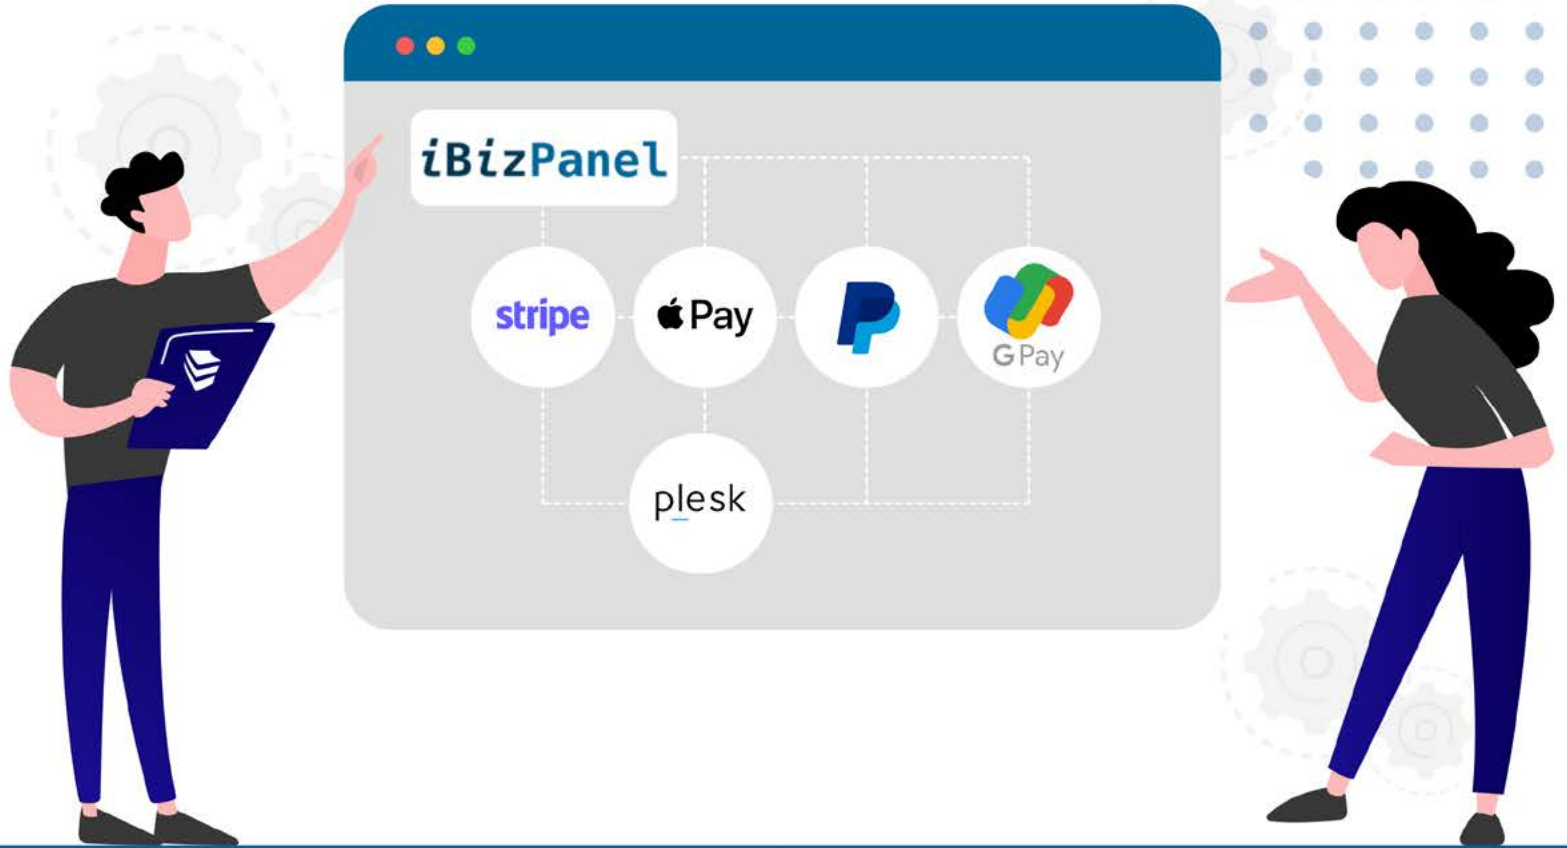

The **iBizPanel** has powerful integrations that allow lengthy and manual processes to be performed automatically in just a few seconds.

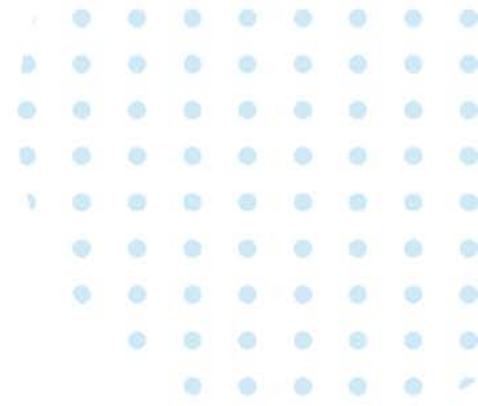

It is possible to make payments with the preferred payment method either Credit Card, PayPal, Apple Pay or Google Pay.

Integrations

Technologies

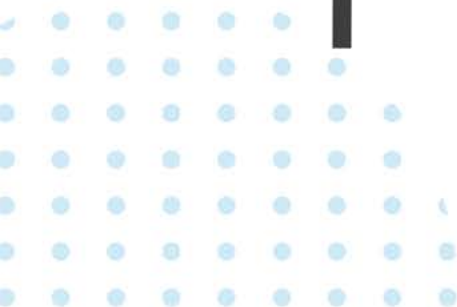

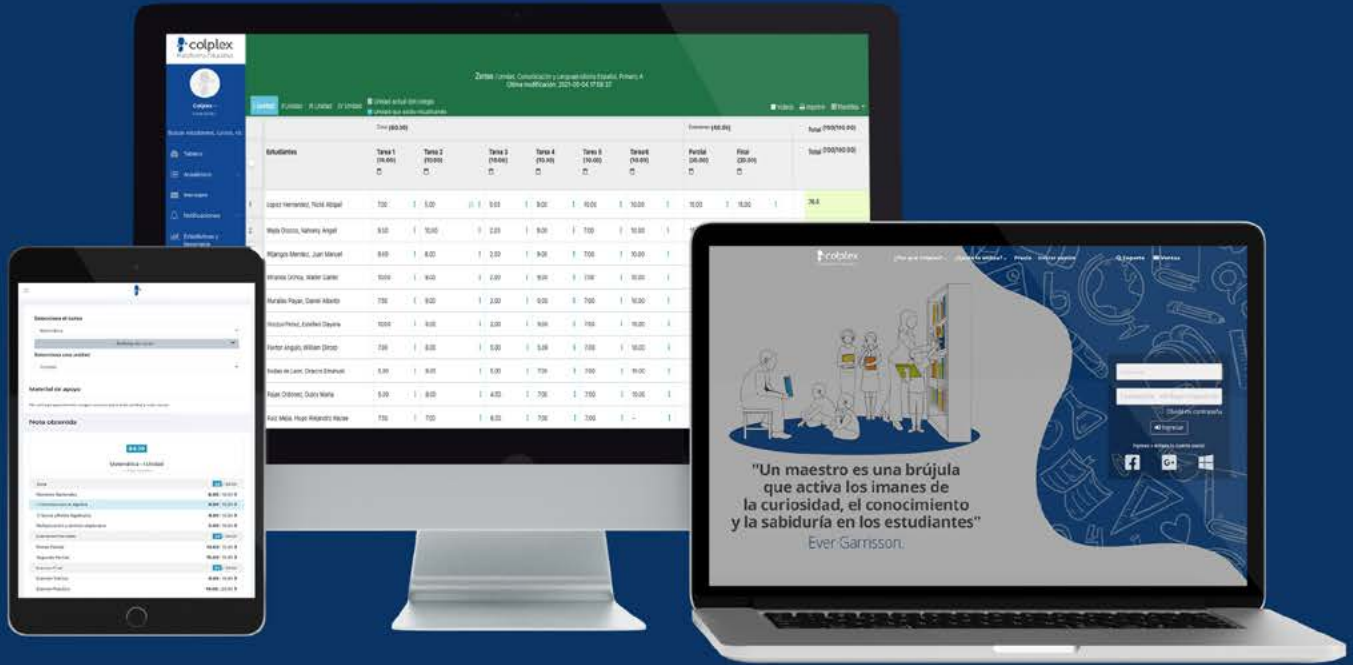

The **Colplex** Project

Colplex is a software application for the administration, documentation, tracking, reporting, automation and delivery of educational courses, training programs, or learning and development programs.

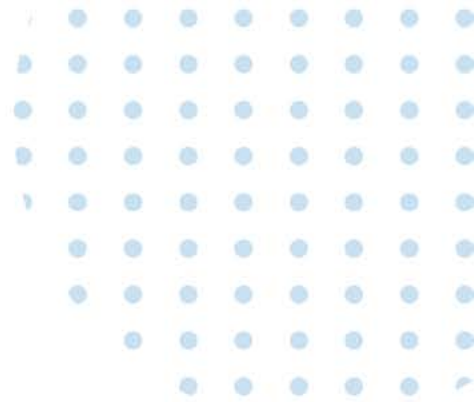

With over 10 years of DevOps experience, **Colplex** has become the most complete and accessible platform for schools and academies due to the integration of many resources (educational, administrative and financial) in a single solution.

Integrations

Technologies

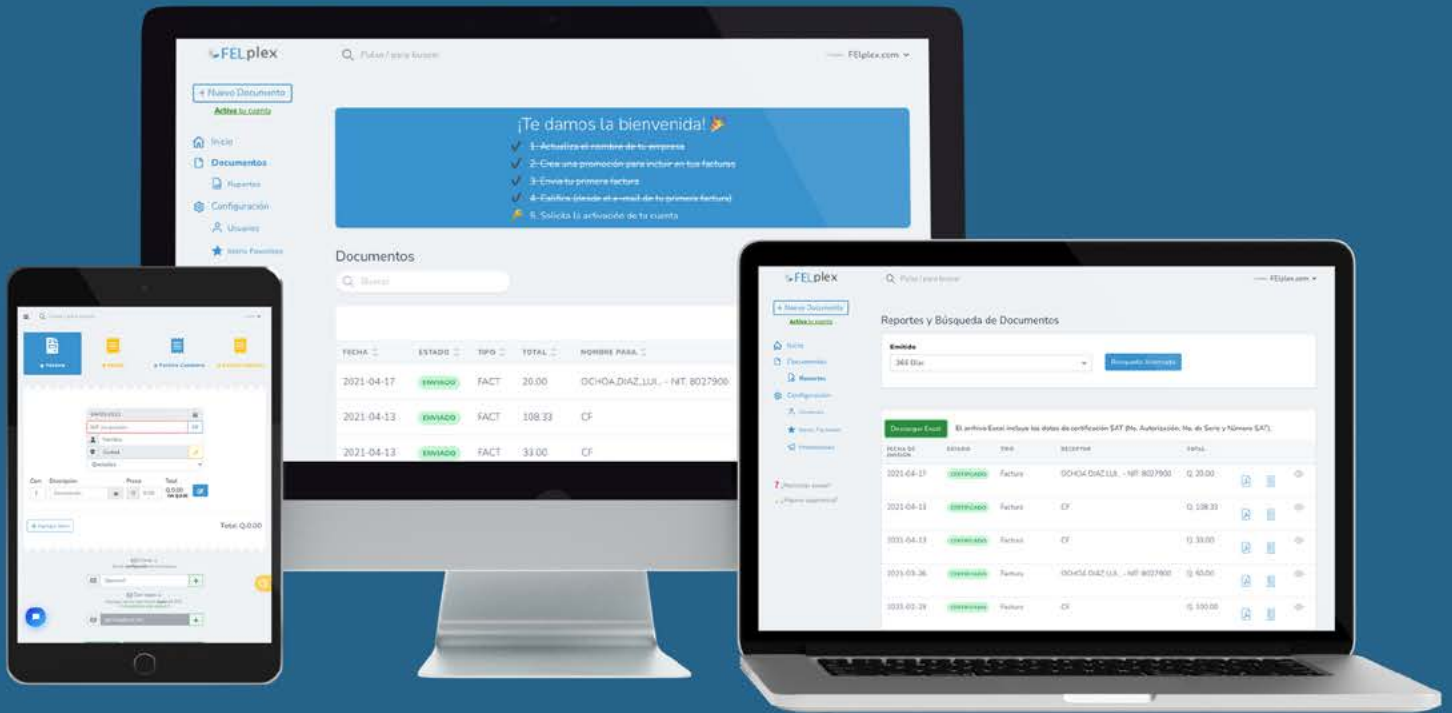

The **FELplex** Project

A thick, vertical black bar is positioned to the left of the text block, extending from the top of the text area down to the bottom of the text area.

FELplex provides a platform for customers to generate invoices that are digitally signed by the governments throughout Latin America.

Currently integrating payment processing systems in each country where it operates.

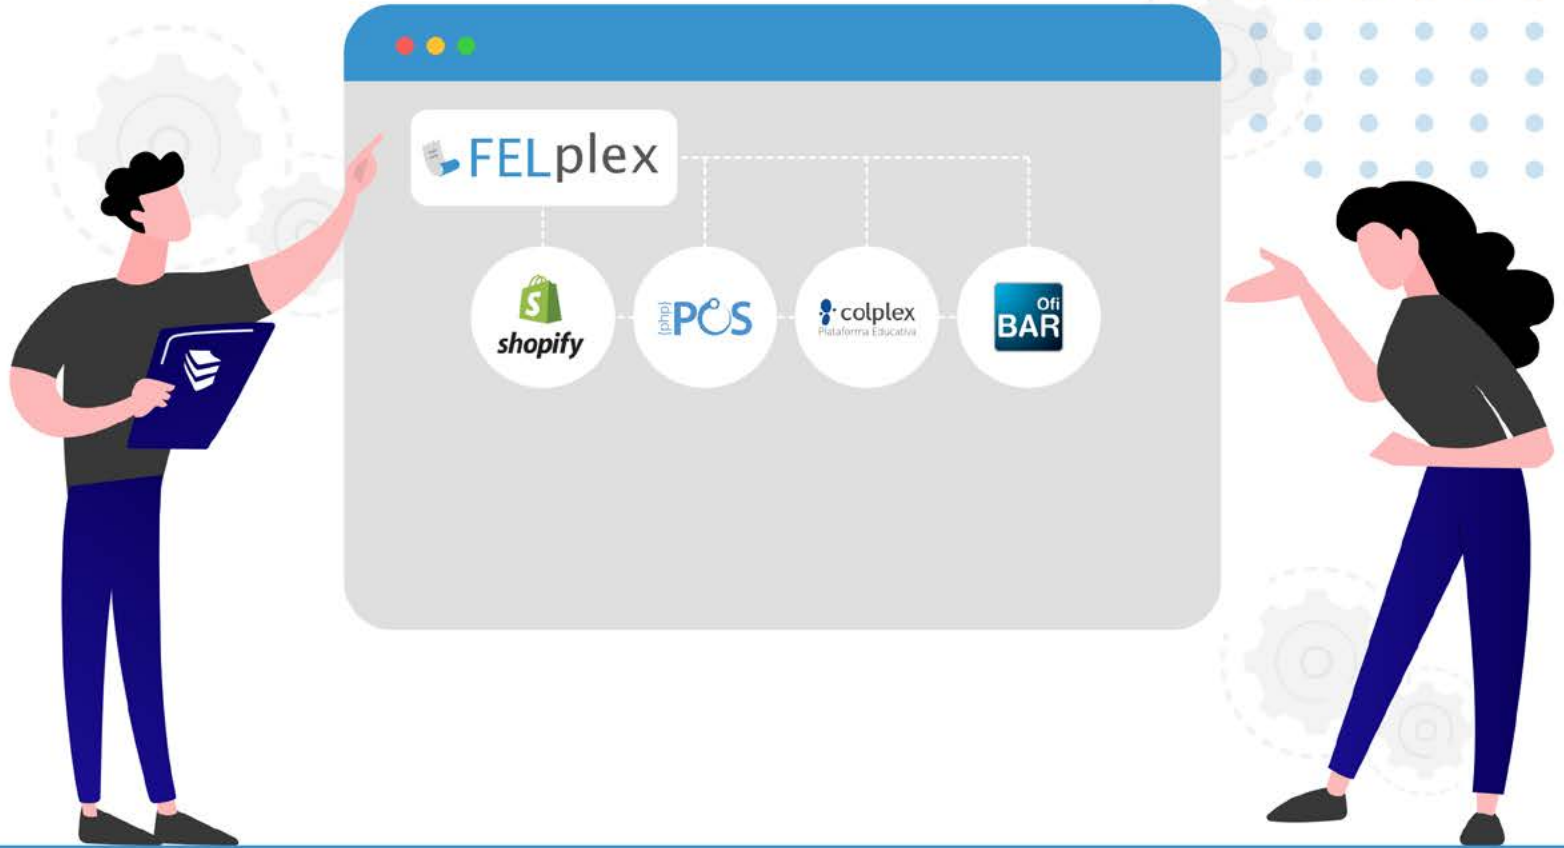

FELplex integrates marketing and advertisement tools to close the gap between the businesses and their customers.

The system provides a self onboarding process and activation as well as credit card payment processing integrated with local vendors in each country.

Integrations

Technologies

The **Field Tech Fitness Solutions** Project

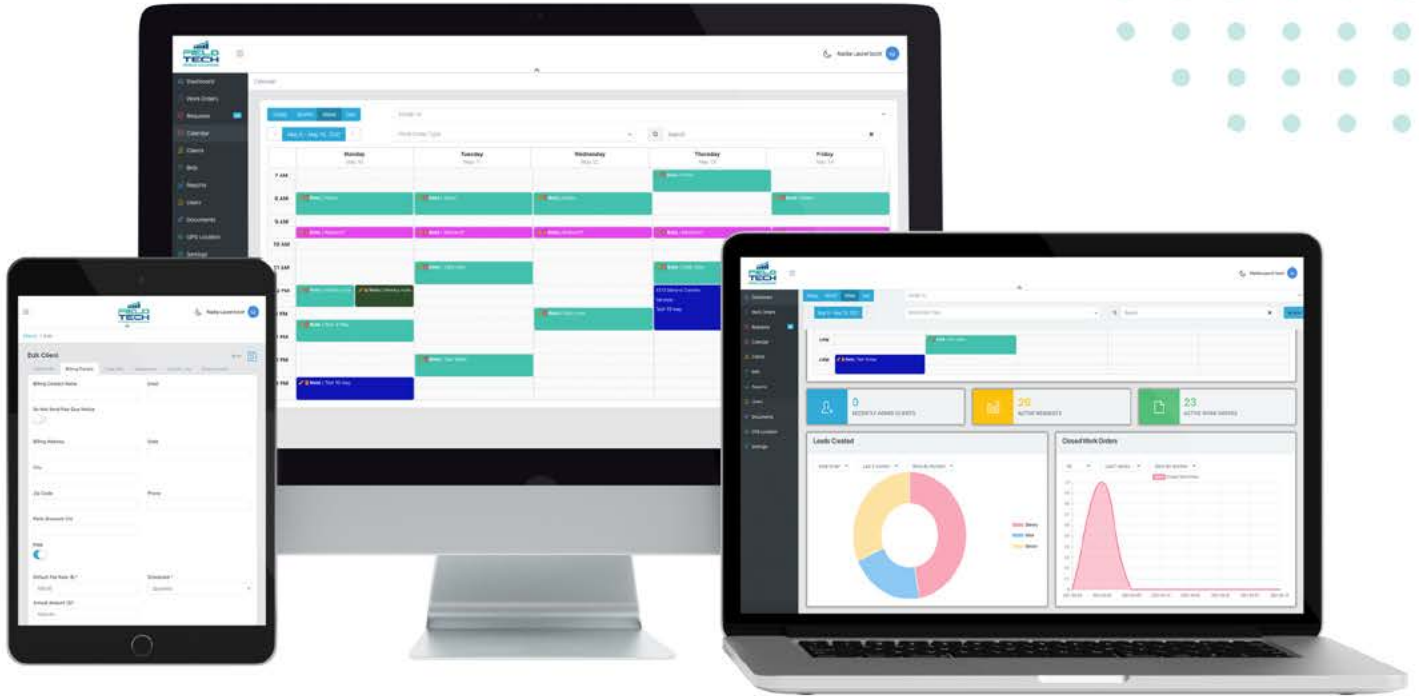

If you install or service fitness equipment, Field Tech is a must have.

Field Tech Fitness Solutions will take all the paperwork, all the scheduling, all the invoicing, all of the hassle out of your daily operations.

Clean, easy to read reports are ready and available on the dashboard to keep the customers updated and ready for business.

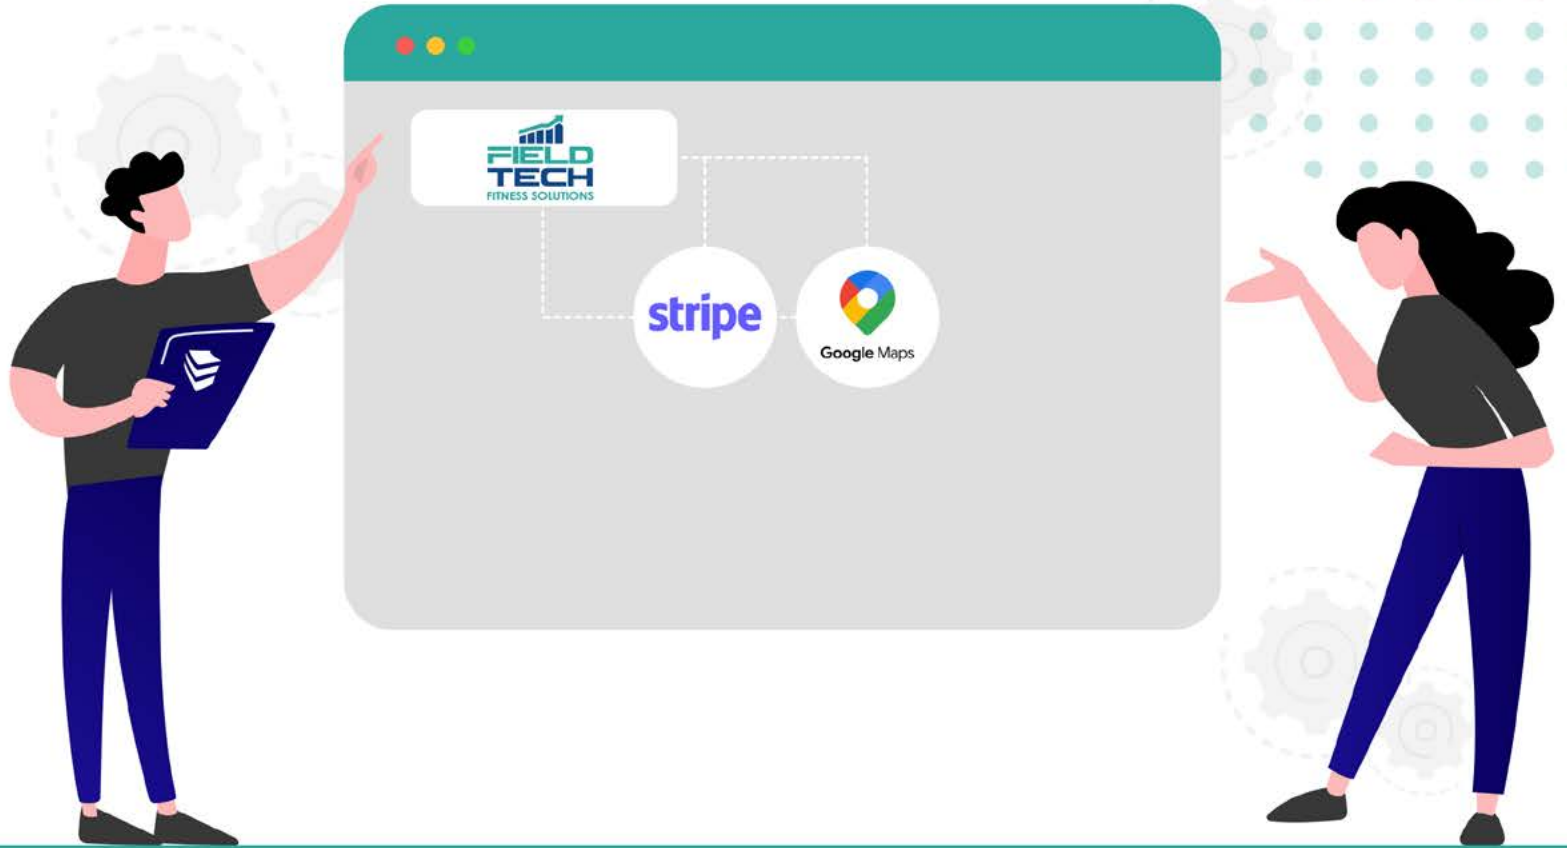

Our role in the **Field Tech Fitness Solutions** project

We have been involved during the entire process, initially creating wire-frames for the application.

- Automated subscription.
- Stripe integration.
- Azure DevOps.
- Create and maintain the infrastructure.
- Automated processes using CI/CD in Azure Pipelines.

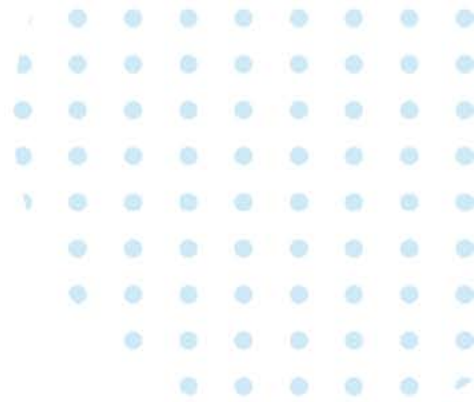

Integrations

Technologies

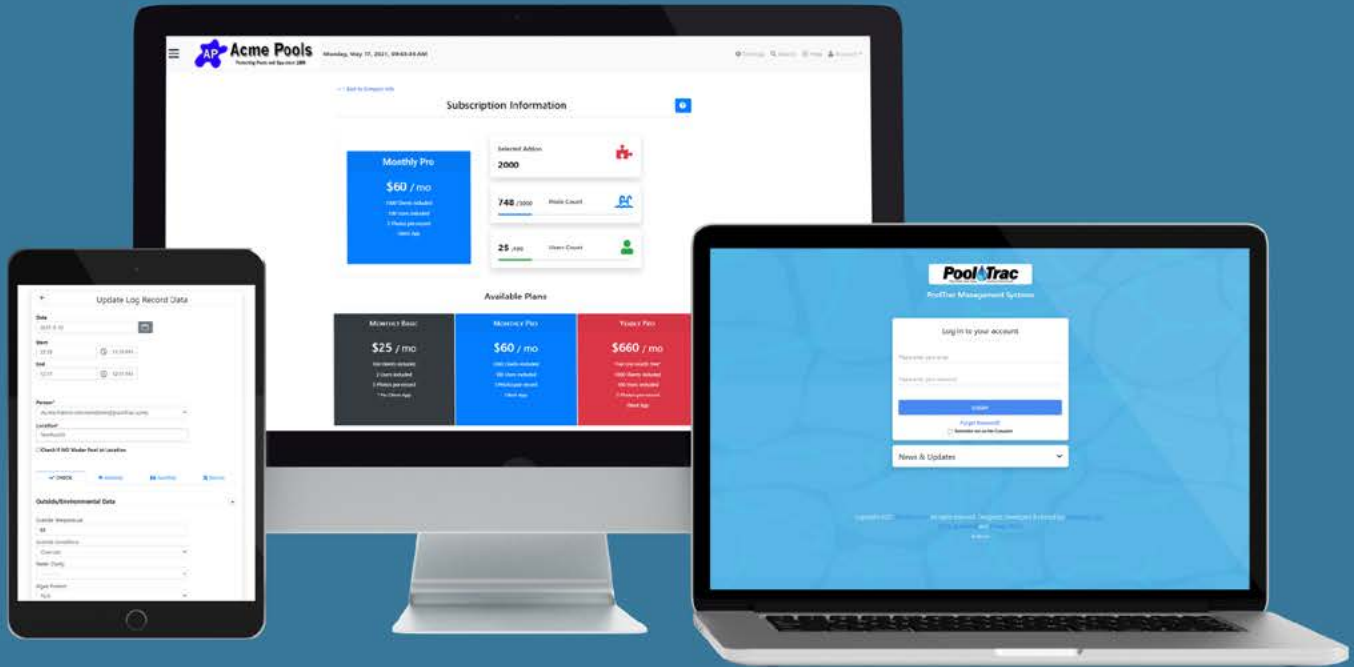

The **PoolTrac** Project

The possibilities are truly endless with **PoolTrac Pro**, as it has been developed and designed around all facets of pool management.

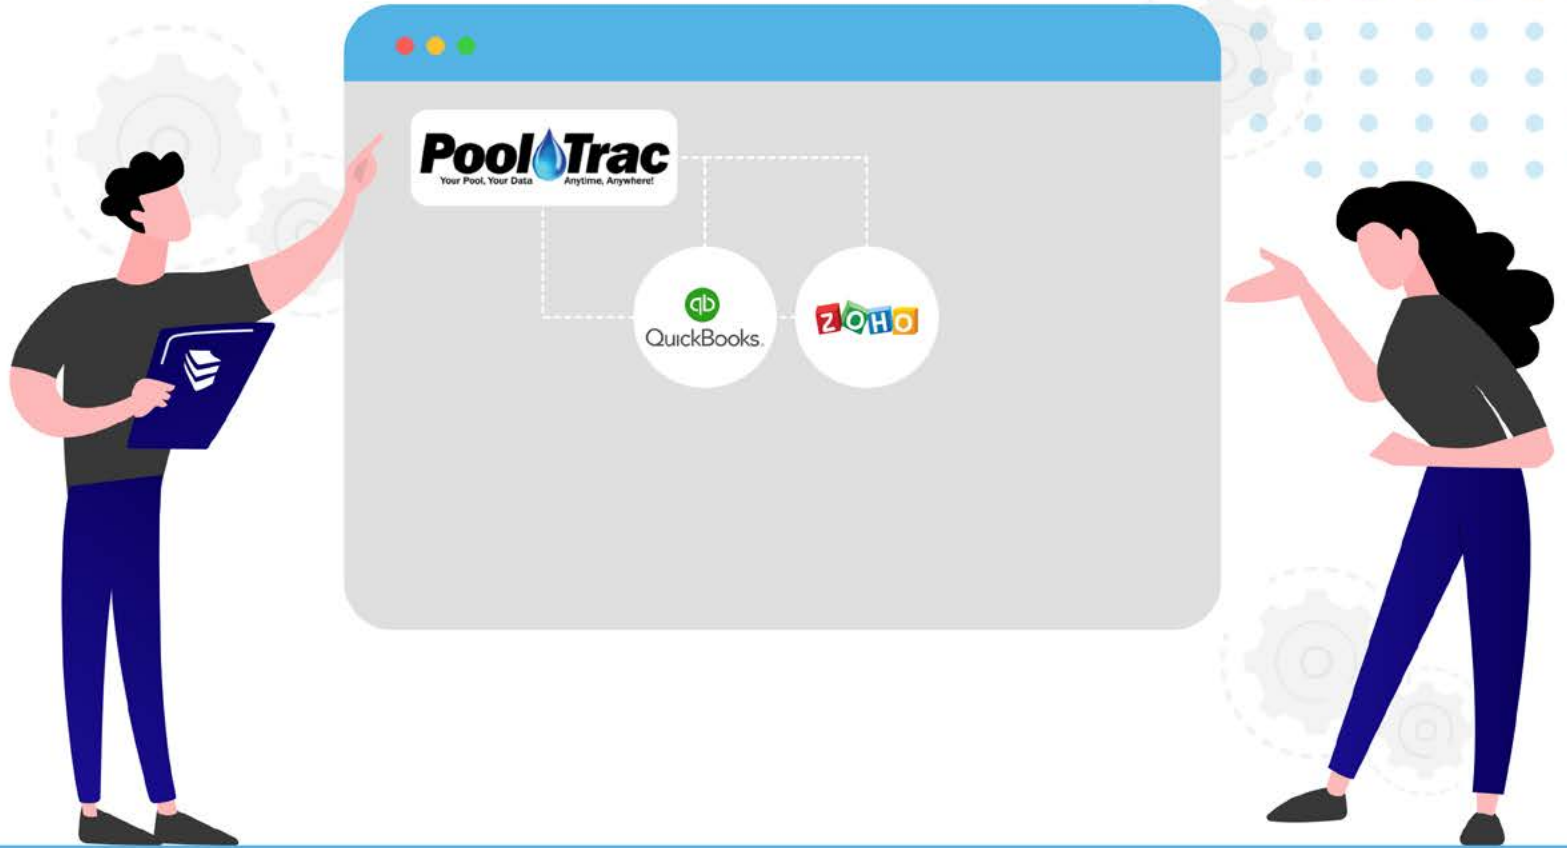

PoolTrac provides an unprecedented level of communication between management, employees and the customer.

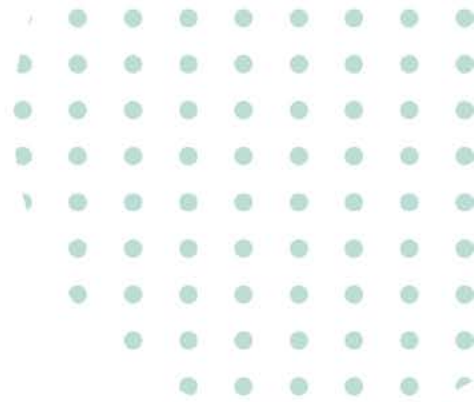

PoolTrac, a web and mobile-based application, gives you access to detailed information about your facilities, like cleanliness, functionality of equipment, and water chemistry.

Integrations

Technologies

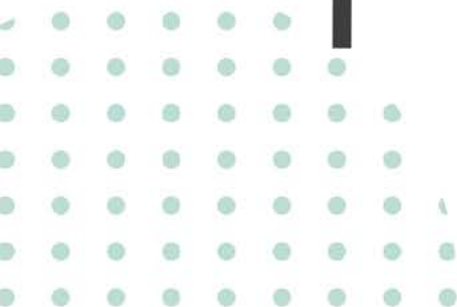

The **MultiGreen** Project

Admin portal for **MultiGreen**, a real estate development and operating company specializing in ground-up construction of attainable, sustainable and tech-enabled multifamily housing.

The investment portal presents all documents related to a project to potential investors. Investors are able to see their investments and obtain progress reports.

A full fledged CRM with integrations for Twilio for messaging allows the MultiGreen team to be on top of leads.

Communication system with developers and integrations into AutoDesk cloud, SharePoint Online and Procore make this the central cloud hub for the company.
